

MAINTENANCE MANUAL

PANELS
GRACCO SURFACES

To maintain the performance of GRACCO SURFACES panels throughout the life of the façade, in addition to the criteria considered in the project and the inherent characteristics of concrete, some simple recommendations should be taken into account.

Short term (0 to 5 years)

The facades with GRACCO SURFACE panels do not require maintenance.

Medium term (5 to 10 years)

It is recommended to clean the facade, and a visual inspection may be advisable.

Long term (more than 10 years)

Visual inspections should be conducted. If necessary, facade cleaning can be performed using high-pressure water, or chemicals to prevent the effects of the environmental conditions to which the facades are exposed.
